EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife.

Please see our website for the latest information: <http://www2.epa.gov/region8/gold-king-mine-release-emergency-response>

Regular updates will be posted as they are available.

Why is there no mention at all on your website about your screw-up in Silverton? And you wonder why we don't trust the EPA or anything else the Federal Government handles? If a private company had done what you did, you would be yelling, screaming and fining the hell out of them. But you screw up (royally) and not a peep.

I am encouraging my Senators to crawl down your backs. Fortunately, Senator Gardner is not beholden to Obama so he will do something. Senator Bennet is in Obama's hip pocket so I imagine he will be as silent about this as you are.
